## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-13, 15-16, 18 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest A projection system, comprising:

an integrator with an output end;

a matrix of output windows at the output end of the integrator;

*a pattern of red, green and blue monochromatic filters on the matrix of output windows passing a matrix of red, green, and blue monochromatic pixels of light;*

an imager for modulating the matrix of monochromatic pixels of light; and

*a light shifting device for shifting the matrix of monochromatic pixels of light to temporally form a pattern of overlying monochromatic pixels of light of different colors, viewable as a color image.*

"Pixels" are a contraction of "picture element." A small element of a scene, often the smallest resolvable area, in which an average brightness value is determined and used to represent that portion of the scene. Pixels are arranged in a rectangular array to form a complete image.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2851

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
